

Update Product Pricing Details

- 1) You need to get an API Key. Send us an email at support@eutradepoint.com from your registered email address with EUTradePoint. We will revert you with the API Key
- 2) To update a product you need to know the product id on <https://eutradepoint.com/module/marketplace/productlist>

The screenshot shows the EUTradePoint product list interface. The left sidebar contains a 'BUYER' menu with options: EDIT BUYER PROFILE, DELIVERY ADDRESS, DEAL HISTORY AND DETAIL, SHIPPING PREFERENCE, FILL MY VAT NUMBER, BUY QUERIES, and MY POST BUY REQUESTS. Below this is a 'SELLER' menu with a 'DASHBOARD' option. The main 'PRODUCT' section has a '+ ADD PRODUCT' button, a search bar, and a table of products. The table has columns for ID, Image, Name, EXW Price, FOB Price, Unit, Min. Order Qty, Status, and Actions. A red arrow points to the 'ID' column header. The table contains one row with ID 555, Name 'Product to Test APIs', EXW Price €2,225.00, FOB Price €3,145.00, Unit 'box', Min. Order Qty 1, and Status 'Approved'. Below the table, it says 'Showing page 1 of 1' and has 'Previous', '1', and 'Next' navigation buttons.

- 3) Use the below XML with appropriate data and send

CURL Example with JSON output

```
curl -i -X PUT \  
  -H "Content-Type:application/xml" \  
  -H "Authorization:Basic V0NINTNKTTM3UEsxSFRXWkJYSIhHRE5FV/kRaQzNITIU6" \  
  -H "Output-Format:JSON" \  
  -d \  
'<?xml version="1.0" encoding="UTF-8"?>  
<prestashop xmlns:xlink="http://www.w3.org/1999/xlink">  
<product>  
  <id><![CDATA[555]]></id>  
    <price><![CDATA[250.00000]]></price>  
  <fob_price><![CDATA[420.000000]]></fob_price>  
  <state><![CDATA[1]]></state>  
  <active><![CDATA[1]]></active>  
  <int_product_nm><![CDATA[TESTnmb876]]></int_product_nm>  
  <supplytype><![CDATA[TESSupplyType897]]></supplytype>  
  <unitprice><![CDATA[meter]]></unitprice>  
  <unitdes><![CDATA[UnitDescyugjh hjgg]]></unitdes>
```

```

    <placeoforigin><![CDATA[Spain]]></placeoforigin>
    <name>
        <language id="1"
xlink:href="https://eustradepoint.com/api/languages/1"><![CDATA[English-Product for negotiation
& API test]]></language>
        <language id="4"
xlink:href="https://eustradepoint.com/api/languages/4"><![CDATA[Spanish-Product for
negotiation & API test]]></language>
    </name>
</product>
</prestashop>' \
'https://eustradepoint.com/api/products/555'

```

Above request will give response in JSON because we have passed **Output-Format** header else the default response type is xml

555 is the **product id** which you want to update

Attributes marked in red color are mandatory

Please find below the mapping of **XML attribute** with the **product information** as below

- Product Name in English - <name><language id="1" xlink:href="<https://eustradepoint.com/api/languages/1>">
- Internal Product Number - <int_product_nm>
- EXW Price (tax excl.) - <price>
- FOB price (tax excl.) - <fob_price>
- Unit for the price - <unitprice>
- Unit description - <unitdes>
- Place Of Origin (Country) - <placeoforigin>

4) If you want output in XML then don't pass **Output-Format** header

Export Deals

I assume that you already have an API key, if not please send us an email at support@eutradepoint.com from your registered email address with EUTradePoint. We will revert you with the API Key

CURL Example for calling Deal Export API

```
curl -i -X GET \  
-H "Authorization:Basic V0NINTNKTTM3UEsxSFRXWkJYSIhHRE5FVkJRaQzNITIU6" \  
-H "Output-Format:json" \  
'https://eutradepoint.com/api/deals'
```
